

Be Smart About Spills: Prepare a Spill Kit

Have you seen this sign? Your business may be close to a municipal well or surface water intake. Preparing a spill kit can help you manage chemical and waste spills that could pollute our drinking water sources.

1. Determine what kind of spill kit you need

What kind of substance will you need to absorb?

Universal, oil or chemical kit?

2. Fill your kit

Include spill response and clean up supplies

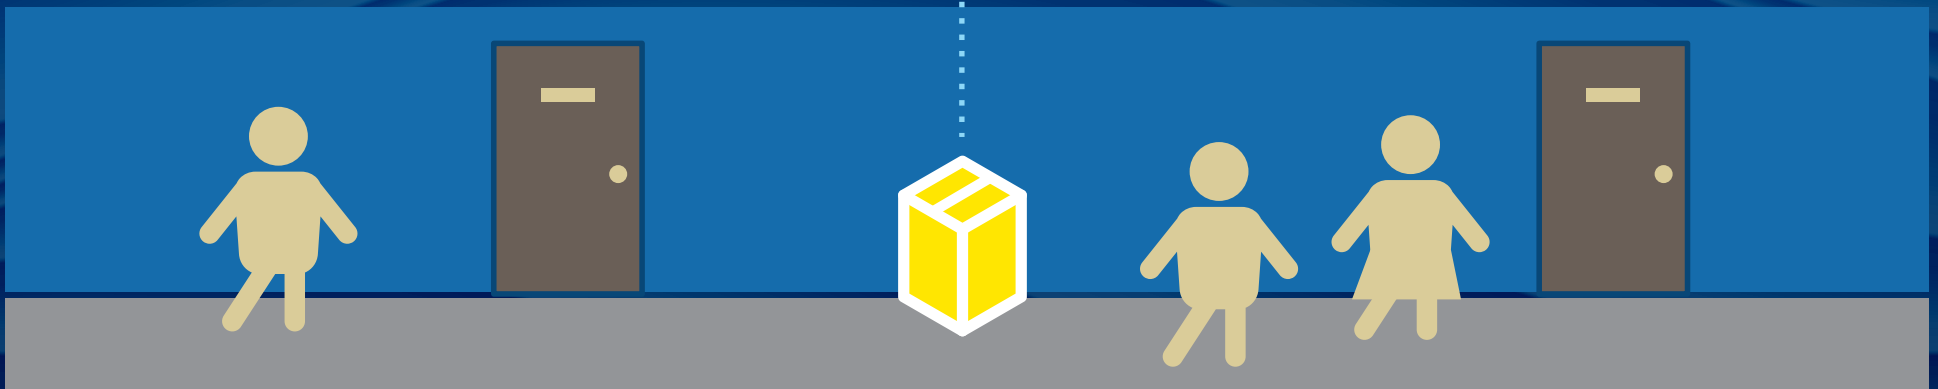

Include personal protective equipment

Other supplies based on specific substance

3. Store the kit in an accessible area

4. Maintain spill kit supplies

5. Train your staff

on how to use the spill kit

Resources: • See protectingwatermatters.ca and ontario.ca/page/source-protection. Search the Source Protection Information Atlas to find out if your business is located near a municipal drinking water source.
• Report spills to the Ministry of the Environment, Conservation and Parks–Spills Action Centre at **1-800-268-6060**. Learn more at ontario.ca/page/report-pollution-and-spills.
